ABRASIVE SPIRAL BANDS

General information

The Abrasive spiral bands offers easy change and application of fine grinding and aggressive polishing. It can apply with rubber drum holder to drill grinders.

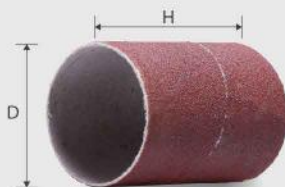

ADVANTAGES:

- ▶ Easy change and abrasive spiral band matches with rubber drum holder well.
- ▶ It allows longer tool life with efficient grinding speed.
- ▶ Lower costs

APPLICATIONS:

- ▶ Rough removing
- ▶ Deburring
- ▶ Surface cleansing and grinding
- ▶ Edges polishing
- ▶ Weld seams polishing
- ▶ Other fine grinding

RECOMMENDATIONS FOR USE:

- ▶ Turn on to the minimum speed for the rubber drum holder so that to check the abrasive spiral band is fitting securely.
- ▶ Please use the production with a safe recommendation rotating speed of 20-30m/s in safety purpose.
- ▶ Grinding oil is applicable according to the metal applying, so that to increase the tool life and abrasive performance capacity.
- ▶ Using with flexible shaft drives, drill grinders and straight grinders.
- ▶ Rubber drum holders should order separately

Raw Material available: Aluminium oxide, zirconia
Shape available: Cylinder Type

TABLE:

Production code	Size(mm)	MOQ	Grit#	Material
SQ003	6.5*12.7	40000	80/120/180/240	Domestic alumina

CYLINDER TYPES- SPIRAL BAND RUBBER DRUM HOLDERS

General information

Rubber drum holders is matched with spiral band sizes, well-suited to the cooperating speed and contact pressure with the abrasive spiral bands.

TABLE:

Production code	Size(D*H*d mm)	Arbor length (mm)	MOQ
SBH001	6.5*12.7*2.34	35	100
